Education
of Antwerp

Our dream?

EVERYONE
IN THEIR PLACE

A lot of non-native speakers and children with special needs

A **challenging climate** for a teacher:

- Tutoring adjusted to their **individual learning needs**.
- **Establish special programs** to learn to read, write and do maths.
- Creating a **safe climate** for children, because of their history.
- **Improve** language and communication **skills**.
- Working on **inspiration, participation, expertise, openness** and **trust**.
- **Prepare** them for our **modern society**.

Face this challenge with IT!

A **Paperless** pilot project:

- With the help of **Microsoft** and **i3 Technologies**.
- Students with **Surface devices** and “**OneNote for Classrooms**” based curriculums.
- Drastically **improve** and **simplify** the **differentiation methods**.
- **Feels natural** for the children.
- Students develop **problem solving** and **collaboration skills**.
- A **great hub for** new and exciting **projects!**
